## SUMMARY

Junior Front-end and Mobile developer. Survived 22 years on this planet. I would take on the challenge to live a few years on Mars, if the opportunity arrives. Big tech enthusiast. Deeply interested in technological innovation and the wonders around it. Been a computer nerd and a gamer since day one.

I am organized, reliable and can manage many priorities at once, with a positive attitude. I am willing to take on extra responsibility to meet the team goals. Currently doing a bachelors degree in Front-end and mobile development while also following the development of blockchain and web3.0 technologies.
